

Before you begin!

Ensure your eligibility

Qualifying customers are outlined in the Terms and Conditions on the last page.

Review all Terms and Conditions

Terms and Conditions located on last page.

Purchase qualifying equipment or services

Visit rockymountainpower.net/hes or call 1-800-942-0266 for information regarding equipment or service qualifications.

Keep in mind:

● **Review the Incentive Application**

Review your Incentive Application form with your contractor. They can aid you in finding qualifying equipment or services, required documentation and completing your application.

● **90-day submission deadline**

Completed form and itemized receipt must be received within 90 days of purchase, installation or completed service to meet eligibility criteria.

● **Fill everything out in four easy steps!**

All form fields are required unless noted as optional. Incomplete applications and applications not including required documentation may result in denied or delayed incentives.

● **Application assistance**

Call 1-800-942-0266 for answers to any questions you have about your application or incentive.

● **Make a copy**

After completing your Incentive Application, make and keep a copy for your records.

● **Check delivery**

Incentive checks are issued within 45 days of receipt of your completed and approved Incentive Application.

Customer Information (all fields are required unless noted as optional)

Please note that the incentive check will be issued to the primary name on the utility account.

Rocky Mountain Power account number _____ - _____ For account number call toll free **1-888-221-7070**
or log in at rockymountainpower.net.

Name on account _____ Daytime phone (_____) _____

Installation address _____ City _____ State _____ Zip _____

Mailing address _____ City _____ State _____ Zip _____

E-mail address (optional) _____ E-mail is the best way to contact me
(E-mail policy located in Terms & Conditions)

Customer acceptance of terms

I hereby certify that all information is accurate including claims of customer and equipment information. I confirm that the improvements I installed were not required by code. I have read all terms and conditions and acknowledge that Rocky Mountain Power may verify all the information provided. Incentive checks are paid to the Rocky Mountain Power account holder. Customers are responsible for payment to contractors.

Customer signature _____ Date _____

2 Household information *(all fields are required unless noted as optional)*

Data used to calculate energy efficiency

Year house built _____ House square footage (living space) _____ Square footage cooled (ducted) _____

Previous primary heat source:

- Electric furnace
 Electric heat pump
 Natural gas furnace

Current primary heat source:

- Electric furnace
 Electric heat pump
 Natural gas furnace

Previous cooling source:

- Central air conditioner
 Heat pump

Current cooling source:

- Central air conditioner
 Heat pump

What is your gender? (optional)

- Male Female

Do you rent or own? (optional)

- Rent Own

What is the age of the Rocky Mountain Power account holder? (optional)

- 18 - 25
 26 - 35
 36 - 45
 46 - 55
 56 and over

Household income – approx. (optional)

- up to \$24,999
 \$25,000 - \$34,999
 \$35,000 - \$49,999
 \$50,000 - \$74,999
 \$75,000 - \$99,999
 \$100,000 +

How did you hear about the Home Energy Savings program? (optional)

- Online search
 Friend/referral
 Retailer sales staff
 TV/Radio ad
 Bill stuffer

3 Contractor information

Some incentives require a **Program Qualified Contractor**. Visit rockymountainpower.net/hes for details.

Contractor/Company name _____ Contractor phone (____) _____

Contractor address _____ City _____ State ____ Zip _____

Technician name _____ Rocky Mountain Power certification # _____

Work completed date _____

Acceptance of terms

I hereby certify that all information is accurate including claims of customer and equipment information. I have read all terms on this application and acknowledge that Rocky Mountain Power may verify all the information provided.

Technician signature _____ Date _____

4 Pick your incentive

Central air conditioner incentive

Please check the incentive(s) you are applying for:

Additional required documentation

Customer

Contractor

- Central air conditioner equipment
minimum 15 SEER, 12.5 EER & TXV

- Certificate of AHRI-Certified Performance for central air conditioner

\$250

\$25

- Central air conditioner best practices installation
minimum 13 SEER & TXV
Program Qualified Contractor required

- HESP Central Air Conditioner Best Practices Installation Worksheet (350 CFM/ton minimum air flow required)

\$50

\$75

- Central air conditioner proper sizing
minimum 13 SEER & TXV

- Manual J load calculation or equivalent. Use information below for sizing assumptions when calculating Manual J.

\$50

\$25

AHRI reference # _____ Manufacturer _____

Purchase date _____ Installation date _____

Outdoor (condenser) model # _____ Condenser serial # _____

Indoor (coil) model # _____ SEER _____ EER _____ Cooling capacity (Btu/h) _____

Central air conditioner incentive, continued

Furnace model # _____

Calculated cooling load (if applicable) (Btu/h) _____ Thermal expansion valve (TXV) installed? Yes

Please use the following summer design conditions when calculating the cooling load.

Sizing assumptions - State of Idaho Minimum Design Indoor Dry Bulb Temperature cooling: 75°F Maximum Design Indoor Dry Bulb Temperature heating: 70°F	Building Age	ACH Envelope	ACH Fireplace
	≤ 2 years	0.2	0.05
	2 < Age ≤ 11	0.4	0.10
	> 11 years	0.5	0.20

Central air conditioner / Heat pump tune-up incentive

Please check the incentive you are applying for:	Additional required documentation	Customer	Contractor
<input type="checkbox"/> Central air conditioner tune-up Program Qualified Contractor required	<input type="checkbox"/> Central air conditioner / heat pump tune-up Worksheet (350 CFM/ton/minimum air flow required)	\$100	\$25
<input type="checkbox"/> Heat pump tune-up Program Qualified Contractor required	<input type="checkbox"/> Central air conditioner / heat pump tune-up Worksheet (350 CFM/ton/minimum air flow required)	\$100	\$25

Heat pump incentive

Please check the incentive(s) you are applying for:	Additional required documentation	Customer	Contractor
<input type="checkbox"/> Heat pump to heat pump upgrade <i>minimum 8.2 HSPF, 14 SEER, 11.5 EER & TXV</i>	<input type="checkbox"/> Certificate of AHRI-Certified Performance for heat pump	\$250	\$25
<input type="checkbox"/> Electric heat system to heat pump conversion <i>minimum 8.2 HSPF, 14 SEER, 11.5 EER & TXV</i> Eligibility requirements: - Equipment must replace an existing electric heating system (i.e. furnace, baseboards, etc.). - Gas furnace system replacements and first time installations are not eligible.	<input type="checkbox"/> Certificate of AHRI-Certified Performance for heat pump	\$350	\$25

Equipment information

AHRI reference # _____ Manufacturer _____

Purchase date _____ Installation date _____

Outdoor (condenser) model # _____ Condenser serial # _____

Indoor (coil) model # _____ SEER _____ EER _____ HSPF _____

Furnace model # _____ Cooling capacity (Btu/h) _____

Calculated cooling load (if applicable) (Btu/h) _____ Thermal expansion valve (TXV) installed? Yes

Please use the following summer design conditions when calculating the cooling load.

Sizing assumptions - State of Idaho Minimum Design Indoor Dry Bulb Temperature cooling: 75°F Maximum Design Indoor Dry Bulb Temperature heating: 70°F	Building age	ACH envelope	ACH fireplace
	≤ 2 years	0.2	0.05
	2 < Age ≤ 11	0.4	0.10
	> 11 years	0.5	0.20

Duct sealing incentive

Please check the incentive you are applying for:	Additional required documentation	Customer	Contractor
<input type="checkbox"/> Duct sealing Program Qualified Contractor required	<input type="checkbox"/> Duct sealing worksheet showing a 50% reduction in duct leakage to outside (100 CFM leakage reduction minimum)	\$150	\$50

Evaporative cooler incentive				
Please check the incentive you are applying for:	Additional required documentation	Model number	Serial number	Customer
<input type="checkbox"/> Evaporative cooler	<input type="checkbox"/> Itemized receipt with retailer/contractor name, address and phone number; itemized listing of quantity, description, manufacturer; model number and other identifying information as appropriate, purchase date and price, and product installation date			\$100

Required documentation

The following documents must be included for every incentive you apply for:

- Proof of payment**
Copy of endorsed and deposited check, charge receipt, canceled check or credit card statement showing full payment.
- Itemized receipt / contractor invoice**
Please note: must include a description of qualified product or service (include all model numbers), itemized costs, and purchase and installation service dates.
- Any "**Additional Required Documentation**" for each incentive. This is listed in a separate column in each incentive table.

How to receive your incentive

- Purchase and install Program Qualified equipment or services.
 - Verify if your incentive requires a **Program Qualified Contractor**. This will be listed in the incentive tables above, and in the conditions below.
 - For questions about what equipment or services qualify, visit rockymountainpower.net/hes or call 1-800-942-0266.
- Complete all required information on this application. Incomplete forms may be delayed or denied.
- Review and sign the acceptance of terms. Make a copy for your records.
- Mail completed form with **all required documentation** to:
Rocky Mountain Power - Home Energy Savings program
1407 W. North Temple, Salt Lake City, UT 84116

Terms and conditions

Incentive availability

Incentives are available on a first-come, first-served basis according to the postmark date on the application. Please reference the program website at rockymountainpower.net/hes to determine the current status of incentive availability. All equipment must be new and have been purchased and installed prior to submitting an Incentive Application. Applications must include all information requested. Failure to provide this information may result in the delay or denial of the incentive. If required information is not provided within 90 days of application submittal, the incentive application will be denied. Incentive will not exceed purchase price. Additional terms and conditions may apply. Incentives are subject to tariff approval and may change with 45 days of notice. Please visit rockymountainpower.net/hes for current program requirements.

Qualifying customers

Residential electric customers residing in the state of Idaho who purchase their electricity from Rocky Mountain Power on rate schedules 1 or 36 qualify. Landlords who own rental properties served by the company in the state of Idaho where the tenant is billed on rate schedules 1 or 36 also qualify for this program. You can find your rate schedule on your bill, by calling toll free 1-888-221-7070 or by logging in at rockymountainpower.net. Incentive checks will be issued in the name of the customer on the qualifying account.

Incentive specific qualifications and conditions:

Getting Started

Prior to starting a project, find a contractor using the Idaho Participating and Program Qualified Contractors list available at rockymountainpower.net/hes. Note that select incentives must be completed by a Program Qualified Contractor. Review the Incentive Application to determine eligibility requirements, incentive qualifications and required documents to submit for an incentive.

Terms and conditions, continued

Incentive Application and required documents must be received within 90 days of the purchase or completed installation. Incentive checks are issued within 45 days of receipt of the completed and approved Incentive Application. Incentives are not to exceed the purchase price of the equipment or service. Equipment and service work may be inspected for compliance. Incentives are subject to tariff approval and may change with 45 days notice. Additional terms and conditions may apply.

Central air conditioner equipment

Work must be completed by either a Participating or Program Qualified Contractor. Equipment must have a minimum efficiency of 15 SEER, 12.5 EER and TXV (factory or field installed TXV). Equipment must be a new, air-source split or packaged unitary air conditioner with an Air Conditioning, Heating and Refrigeration Institute (AHRI) Standard Rating Cooling Capacity of 65,000 BTU/hr (5.4 tons) or less. Equipment efficiency will be assessed based on the AHRI certificate evaluation of the indoor and outdoor units and how they operate with the air handler. The AHRI directory can be found online at www.ahridirectory.org. For units added to existing air handlers, documentation must be submitted in addition to the AHRI certificate showing air flow of 350 CFM per ton minimum. Contractors must provide documented air flow and testing procedure details.

Central air conditioner proper installation

Work must be completed by a Program Qualified Contractor. Equipment must have a minimum efficiency of 13 SEER and TXV (factory or field installed TXV) as determined by the AHRI directory. Program Qualified Contractor is required to perform air flow test and refrigerant charge check. Air flow must meet minimum 350 CFM per ton requirement. Refrigerant charge must be within +/- 3 degrees of target sub cooling. Program Qualified Contractor must complete a program installation worksheet. Incentives are limited to one installation incentive per unit.

Central air conditioner proper sizing

Work must be completed by either a Participating or Program Qualified Contractor. Equipment must have a minimum efficiency of 13 SEER and TXV (factory or field installed TXV) as determined by the AHRI directory. Equipment must be sized within ½ ton of the calculated cooling load using the summer design conditions on the Incentive Application. Contractor must complete a Manual J or equivalent load calculation. Incentives are limited to one sizing incentive per unit.

Central air conditioner or heat pump tune-up

Work must be completed by a Program Qualified Contractor. Incentive available on existing central air conditioners or heat pumps only. The equipment must serve at least 80 percent of the living space. Furnaces do not qualify for a tune-up incentive. Program Qualified Contractor is required to perform air flow test and refrigerant charge check. Air flow must meet minimum 350 CFM per ton requirement. For units with a TXV, refrigerant charge must be within +/- 3 degrees of target sub cooling. For units without a TXV, refrigerant charge must be within +/- 5 degrees of target super heat. Filters, coils, condensers and blowers must be cleaned. Program Qualified Contractor must complete a program tune-up worksheet. Central air conditioner tune-ups must be performed when outside temperatures are at or above 65 degrees Fahrenheit. Heat pump tune-ups may be performed year round. Incentives are limited to one tune-up incentive per unit every five years.

Duct sealing

Work must be completed by a Program Qualified Contractor. Incentive available on existing ductwork only. Existing ductwork must be located in an existing home. Newly installed ductwork does not qualify for an incentive. Ducts must be located in an unconditioned space. Definition of unconditioned space- an unconditioned space is any space outside of the thermal envelope of the building that is not intentionally heated for occupancy. Home must have an electric heating system or a central air conditioner serving 80 percent of the floor area. Program Qualified Contractor is required to perform CAZ testing, duct leakage testing and seal ducts with mastic. Duct sealing must reduce duct leakage to outside by 50 percent with a 100 CFM minimum reduction. Program Qualified Contractor must complete a program duct sealing worksheet. Incentives are limited to one duct sealing incentive per duct system for the lifetime of the home.

Conditioned vs. unconditioned space - clarification notes

For the most part, basements are conditioned spaces. Basements are not usually thermally isolated from the main living area and contain space conditioning ducts. Basements are also used for storage and frequently contain laundry facilities and other living spaces. Ducts serving unfinished basements are not always equipped with dedicated supply registers, although single registers at plenums are not unusual. An unconditioned basement would have these properties: Thermally isolated from the main floor by insulation in the floor; Insulated, weather-stripped door (if above floor plane) and insulated stairwell walls where thermal plane penetrates floor; air sealed (caulked, foamed penetrations) wiring plumbing, sealed duct penetrations and sealed, insulated ducts. No supply registers. While a crawl space is unconditioned space, the floor must be insulated prior to or at the same time ducts are sealed and insulated to thermally isolate the crawlspace. Failure to do this will increase the heating load of the home and potentially cause comfort issues.

Heat pump equipment (upgrade and conversion)

Work must be completed by either a Participating or Program Qualified Contractor. Equipment must have a minimum efficiency of Equipment must have a minimum efficiency of 14+ SEER, 11.5+ EER, 8.2+ HSPF and TXV (factory or field installed TXV). Equipment must be a new, air-source split or packaged unitary heat pump with an Air Conditioning, Heating and Refrigeration Institute (AHRI) Standard Rating Cooling Capacity of 65,000 BTU/hr (5.4 tons) or less. The AHRI directory can be found online at www.ahridirectory.org. Heat pump must service at least 80 percent of the home's floor area. For the heat pump to heat pump upgrade the new heat pump must replace an existing heat pump. For the electric heat system to heat pump conversion the new heat pump must replace an existing electric heat system (i.e. electric baseboard or electric furnace). Gas, oil, and propane system conversions do not qualify.

Rocky Mountain Power – Home Energy Savings program

1407 W. North Temple, Salt Lake City, UT 84116

Evaporative cooler

Incentive qualifications: In order to receive the evaporative cooler incentive, equipment must be a new, first-time installation. Unit may be installed by customer or by a contractor.

Application details

Rocky Mountain Power reserves the right to conduct random inspections to verify information provided on the application. If your application is selected for review, it will not be processed until the review is satisfactorily completed. Rocky Mountain Power customers should visit the program website at rockymountainpower.net/hes.

The customer hereby transfers to Rocky Mountain Power all "Environmental Attributes" attributable to the Qualifying Equipment or its operation. Environmental Attributes include any and all credits, benefits, emissions reductions, offsets and allowances, howsoever entitled, resulting from the avoidance of the emission of any substance to the air, soil or water at or by PacifiCorp generating facilities through reduced generation of energy or other savings or offsets on account of the Qualifying Equipment.

The customer will not claim ownership of any Environmental Attributes. As long as the customer at the same time states the Qualifying Equipment was made possible with funding from Rocky Mountain Power, the customer may claim that it is facilitating the production of the Environmental Attributes attributable to the Qualifying Equipment.

Rocky Mountain Power issues incentives in the form of checks not utility bill credits. Rocky Mountain Power is not responsible if your dealer provides inaccurate information about the amount and/or conditions of the actual incentive and Rocky Mountain Power will not pay incentives for equipment that is mislabeled or misrepresented by dealers regarding incentive qualifications. Households receiving incentives under the Home Energy Savings program may not receive equipment purchase and installation incentives under other company programs.

By providing Rocky Mountain Power with your e-mail address you agree that we may send you e-mails, occasional "breaking news" alerts and promotions from Rocky Mountain Power's Home Energy Savings Program. We may also e-mail you occasionally with updates and information about the program. Should we elect to change our privacy policy we will post the changes at rockymountainpower.net/hes. Where the changes are significant, we may also choose to e-mail all our registered users with the new policy details.

Incentive Application must be received within 90 days of equipment installation or completed service.
